They can sleep with one eye open to stay alert.

Wild geese can live 10 to 25 years, sometimes even longer.

Geese use loud honks to talk to each other and warn of danger.

Geese fly in a V-shape to help each other save energy on long trips.

Geese protect their families fiercely by hissing and chasing intruders.

Baby geese are called goslings and can swim just hours after hatching.

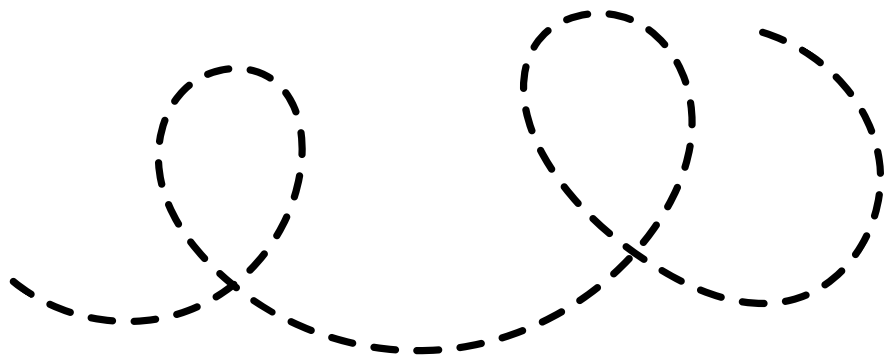

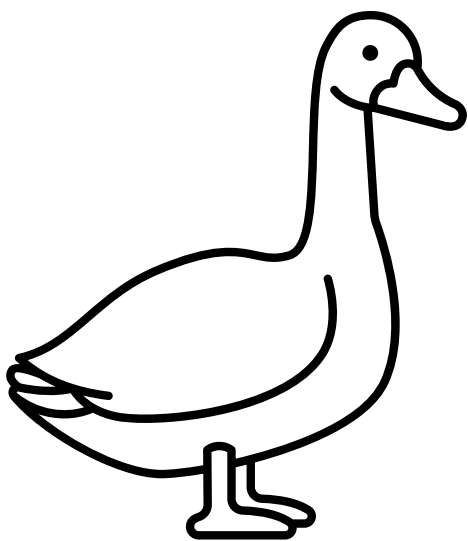

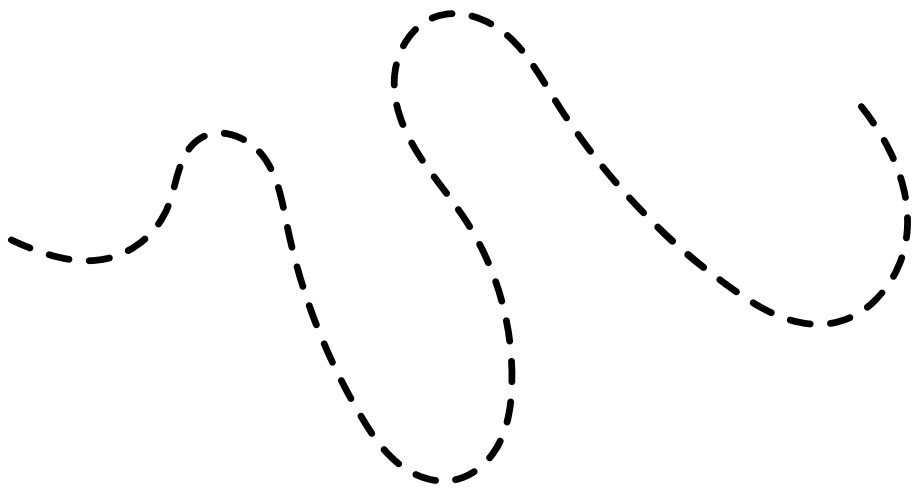

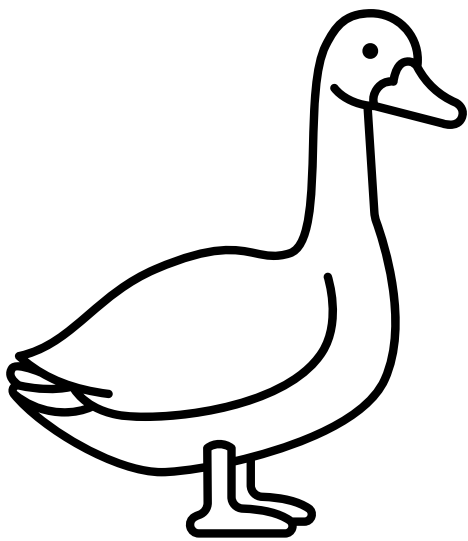

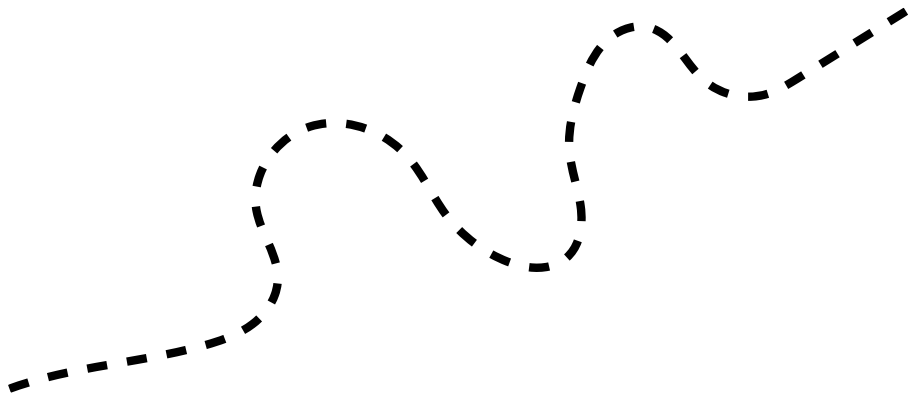

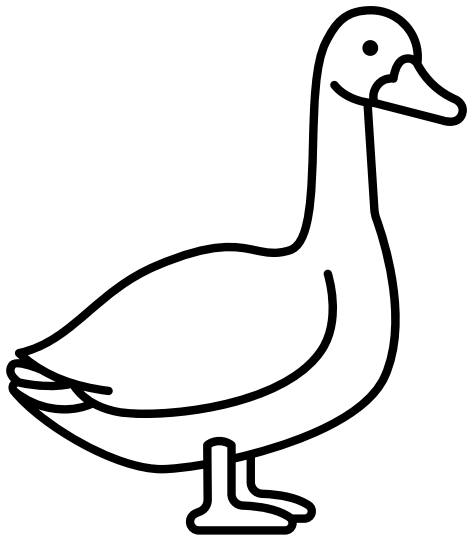

Geese stay with the same mate for life and take good care of their babies.

They can migrate thousands of miles between summer and winter homes.

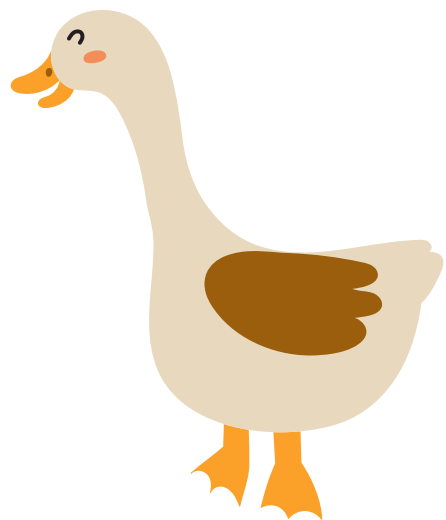

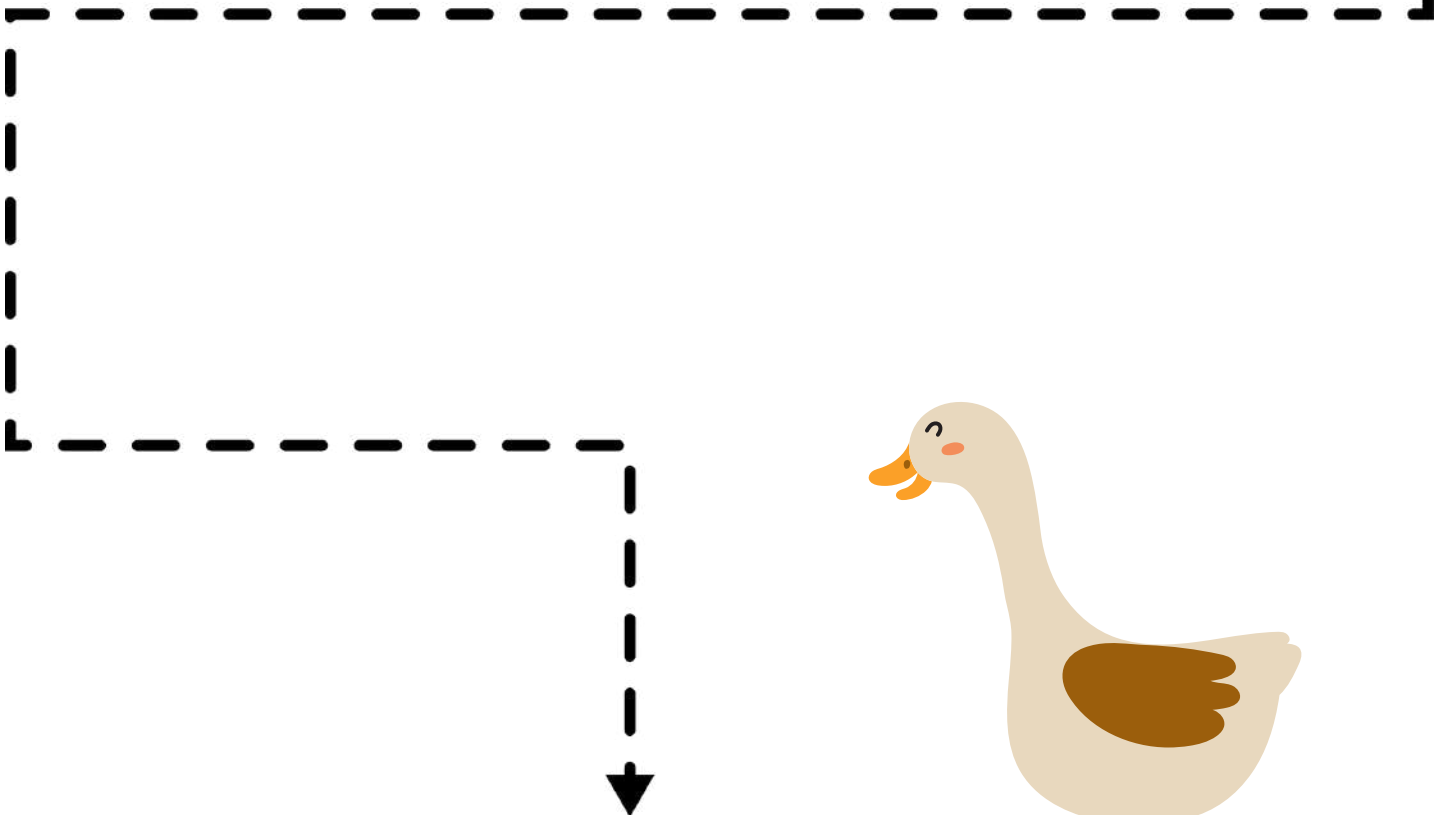

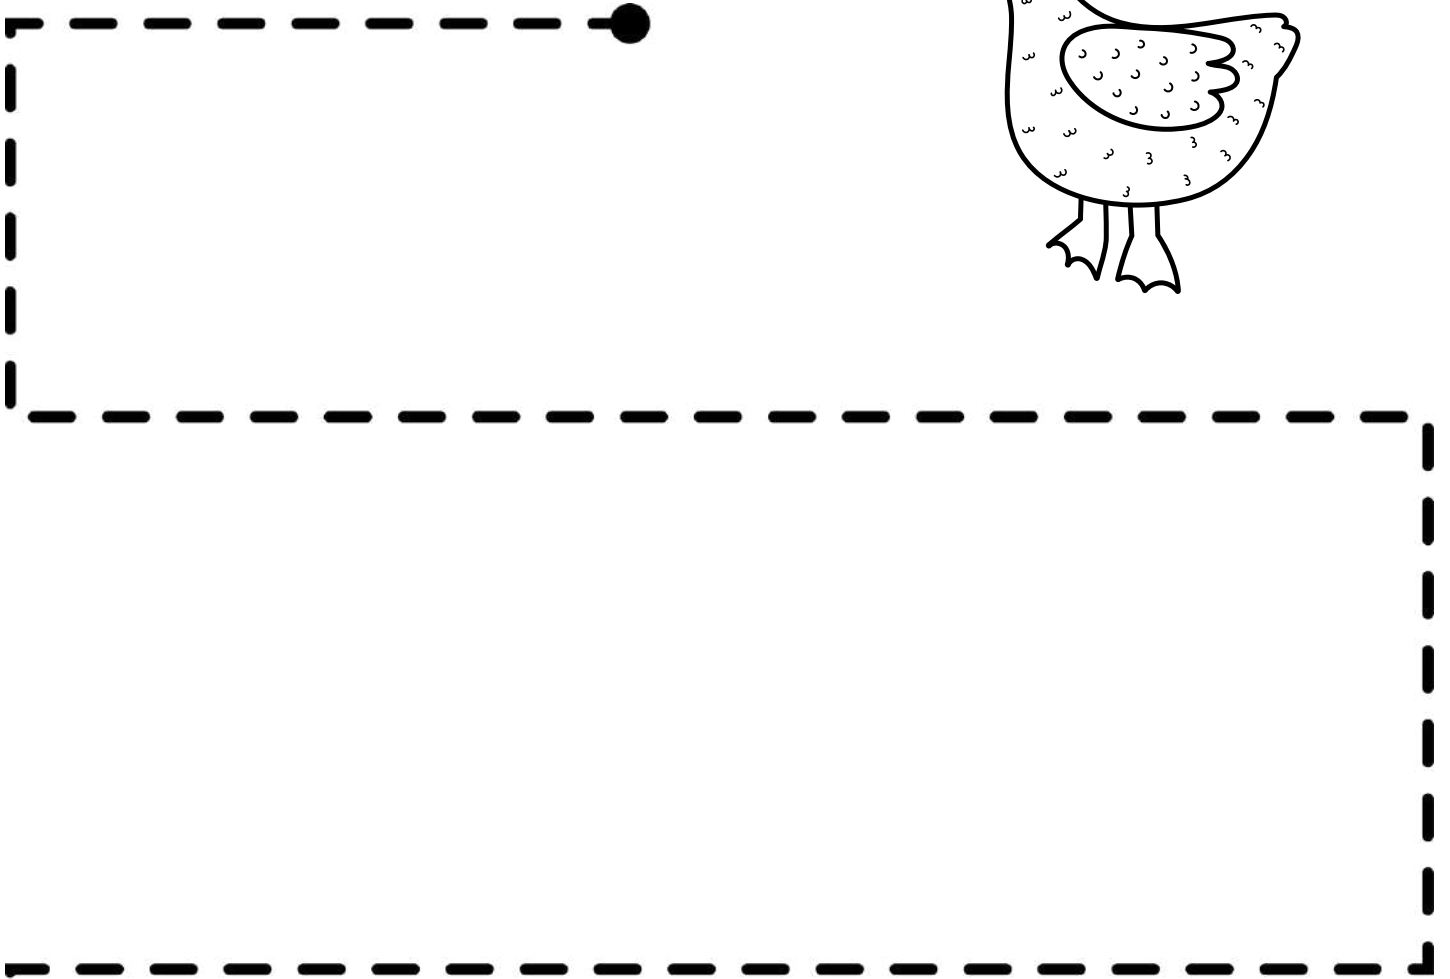

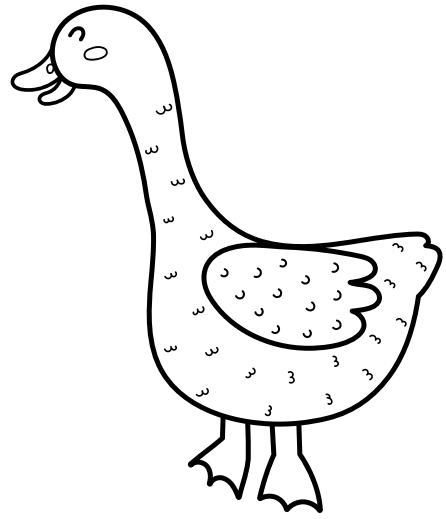

They have strong beaks with edges that help them eat grasses and plants.

Geese can recognize faces – they remember people who feed or scare them.
